DELIVERING SOLUTIONS TO GROW YOUR BOTTOM LINE

Poultry Nutrition Solutions

YOUR TRUSTED NUTRITION PARTNER.

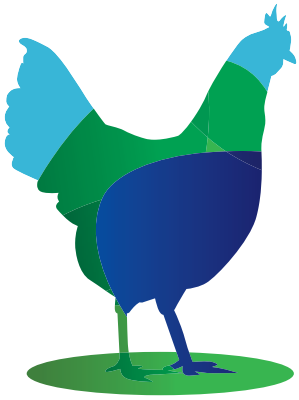
Today more than ever, turning data and information into insights and results is what separates truly high performing businesses.

Market conditions are always changing. At Provimi, our priority is to develop optimal nutrition and management strategies that are dynamic and tailored specifically for you.

Responding confidently to ever-shifting inputs and economic drivers, opposed to reacting subjectively, is what sets Provimi apart from others – and is what helps our customers achieve their long-term performance goals.

We take a data-driven approach and support it with proprietary digital tools and experienced practitioners, so we can provide our customers with insights and business consultants who can help with implementation.

Backed by the scale and scope of Cargill, and our proven track record of success – we strive to be the nutritional business partner that you can depend on.



Optimal Nutrition

Provimi is the nutritional business partner you can trust for optimal animal nutrition solutions in ever-changing market conditions.

Nutrition Strategy

Take advantage of our dynamic nutrition approach to receive recommendations on real-time adjustments for varying market conditions.

- Frequent formulation updates using nutrients, ingredients and feeding programs through Cargill's proprietary system of integrated nutrition capabilities, Cargill Nutrition System, CNS.
- Customized diet designs based on the specific goals, genetics and health of your operation.
- 'What-if' scenario planning and economic projections for better nutrition decisions.
- Monthly formulation reviews to track your operation's performance against goals.

Ingredient Purchasing Support

Leverage Cargill's global micro-ingredient purchasing power and ingredient expertise as a one-stop shop for your dietary and ingredient needs.

- Ingredient pricing reports based on nutrient values.
- Mill pricing comparison reports.
- Preferred pricing on micro ingredients.
- Pallet discounts on micro ingredients.

Supplier Database

Utilize the industry's largest ingredient database to apply nutrient know-how to meet your animals' requirements.

- Optimum ingredient values.
- Complete feed and ingredient analysis.
- Corn particle size analysis.
- Ingredient sampling.
- Toxin analysis report.

Research Firepower

Dedicated research team designs and discovers new nutritional principles for all stages of production utilizing our own and external partners' research facilities.

- Evidence-based study design and analysis.
- Novel measurement and monitoring methodologies.
- Advisory round-table research discussions to gather relevant insights from the technical teams and customers.
- Collaboration with the global network of Cargill Animal Nutrition's Global Innovation Center and Technology Application Center researchers.

Micro Nutrition Technology

Our micro nutrition approach goes well beyond simply selling additives. It's designed to enhance your nutritional program and feed performance, while contributing to overall animal performance and well-being. Provimi nutritionists combine research, technology and product development to create our Promote® portfolio.

PROMOTE®

Profit Optimization

Provimi offers the expertise and experience to interpret data and derive meaningful insights. We collaborate with you to improve business decisions, as well as augment best practices to foster the optimal environment for healthy animals, all within an efficient cost structure.

Digital Solutions

You need to know it all. We offer strategic discussions and frequent business reviews alongside digital tools, so you can make better, quicker business decisions. FLOCKtrak™ is an extensive egg production records management and benchmarking database developed by Provimi.

- Timely implementation of nutrition program to achieve performance goals and manage feed costs.
- Identify opportunities in the production system.
- Expanded benchmark reporting and improved graphing capabilities.
- Easy-to-read, user-friendly reports are accessible via a password-protected web site.
- All data is kept strictly confidential.

Live Production Support

Our on-farm support and recommendations link nutrition, production and performance for the highest return.

- In-person walk-throughs and environmental recommendations.
- Improve farm performance with Benchmark, our evaluation tool that quantifies ventilation. Measurements are taken throughout a poultry house to determine the actual air exchange rate and efficiency of building operation.

Quality Assurance

Every Provimi facility features industry-leading production systems that meet or exceed customer and regulatory requirements. From traceability to technology, Provimi is committed to the highest level of quality assurance.

Feed Manufacturing Services

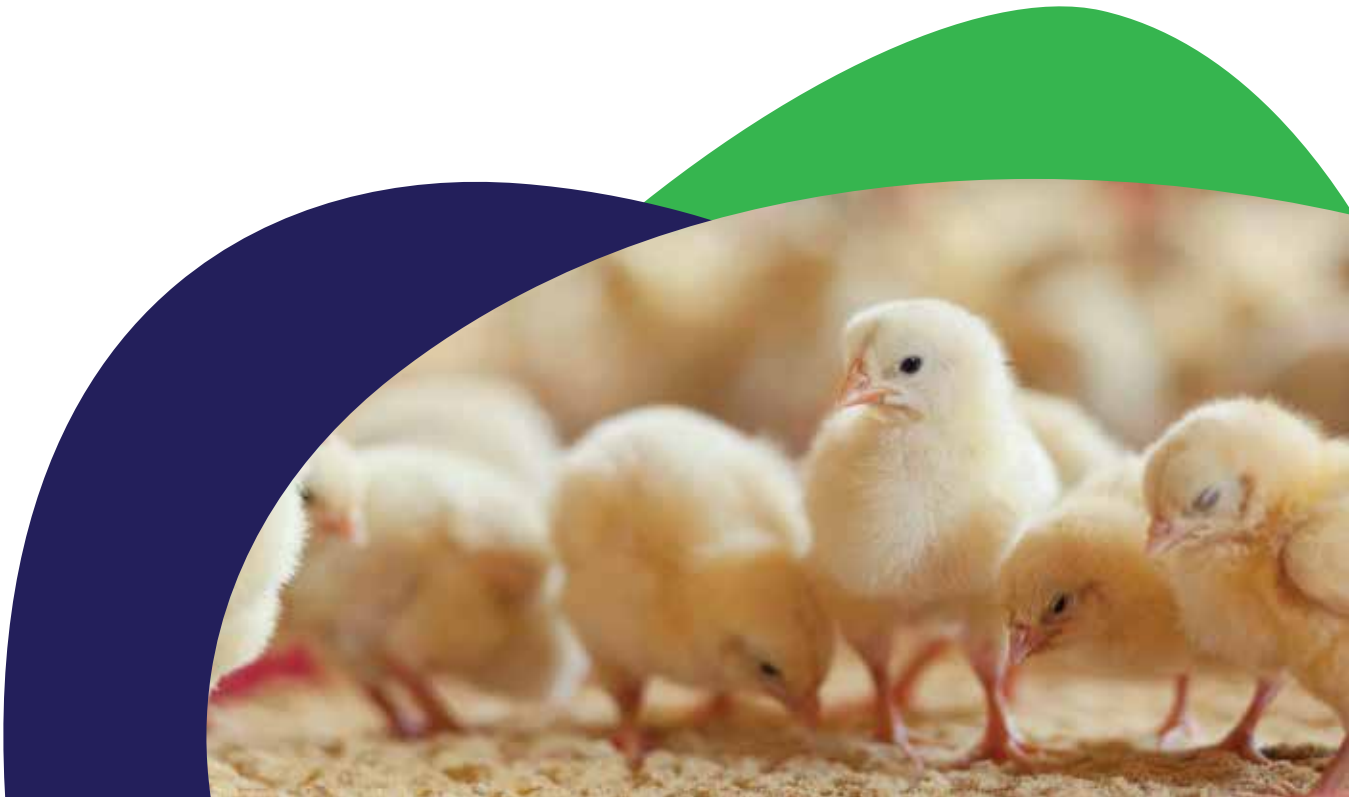
Success in manufacturing requires confidence. Provimi offers you the expertise to optimize feed mill performance and drive results in the barn.

- Mill assessments to identify unmet needs and enhancement opportunities.
- Safety management support and related business impacts.
- Programs to improve product quality and production efficiencies.
- Equipment capability diagnoses.
- Milling economics to understand current labor and non-labor cost structures, as well as equipment upgrades, budget preparation and more.
- FMSA and VFD support.

Feed Safety

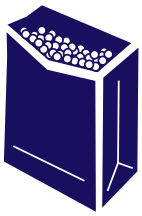
We have developed industry-leading feed safety programs to ensure you receive safe, reliable, high-quality ingredients in all of our products.

- Full-time global and local resources dedicated to feed safety and manufacturing.
- Non-medicated production capabilities to prevent cross-contamination.
- Bar code and RFID technology gives you the highest level of assurance in the traceability of ingredients, additives and other animal nutrition products.
- Supplier audits executed at a global and local level to ensure ingredient accuracy.
- Ingredient samples and analyses.
- Compliance with AFIA Safe Feed/Safe Food and FAMI-QS/International Safe Food.
- Documentation support for customers to meet feed safety audit standards.



Poultry Program and Product Solutions

With Provimi, you get custom nutrition solutions for the turkey, broiler & egg industries. Our portfolio includes solutions for conventional, antibiotic free, organic, and cage free production systems. It is our goal to bring you the best technology and nutritional programs in the industry.



Shell Add-Pack

Shell Add-Pack improves the eggshell quality for layer flocks experiencing problems with shell cracks and checks. Poor egg shell quality causes production loss and extra burden to egg producers. While many factors such as barn management, environmental conditions and animal nutrition can influence eggshell quality, it's important to take preemptive action in the hen's nutrition to promote strong eggshell quality. While it would be nearly impossible to eliminate all egg shell cracking and quality issues, incorporating Shell Add Pack into the nutritional strategy helps promote egg shell quality.

Vitamin Premix Solutions

Provimi's high-quality custom and standard poultry vitamin premix products offer producers and feed manufacturers a simplified, hassle-free mixing process. Provimi knows that strong performance, quality products and cost-effective nutritional solutions contribute to profitable poultry production. The vitamin and trace mineral package that goes into the complete feed is the foundation of poultry nutrition.

- Provimi vitamin premixes are produced with free-flowing technology to prevent clumping and caking.
- Oil additions in the formulation minimize dustiness.
- Traceability of ingredients and premix formulations offer quality assurance.

About Provimi

Provimi is a trusted advisor in animal nutrition and technology.
