

# U.S. Egg Cost of Production and Prices

August 5, 2019

*Compiled by*  
**Maro Ibarburu**

*Sponsored in part by:*

American Egg Board

*The Egg Industry Center Market Reports & Industry Analysis are compiled in the memory of their creator, Don D. Bell, Poultry Extension Specialist Emeritus - UC Davis.*

REPORT NOTE: This report estimates the average layer feed price and cost of production in six different U.S. regions as outlined on the following map. It also reports the EIC projected prices of eggs.

This report uses the corn and soybean meal prices reported by **USDA AMS Market News**. Monthly corn and soybean prices for each region are estimated as the simple average of prices for the States with pricing information in each region (please see map below)

There is no price information for soybean meal in any of the Northeast States. Therefore, we estimate the soybean meal prices for the Northeast region based on the historical relationship with the Midwest price. The West region prices are estimated as the simple average of California and Oregon prices.

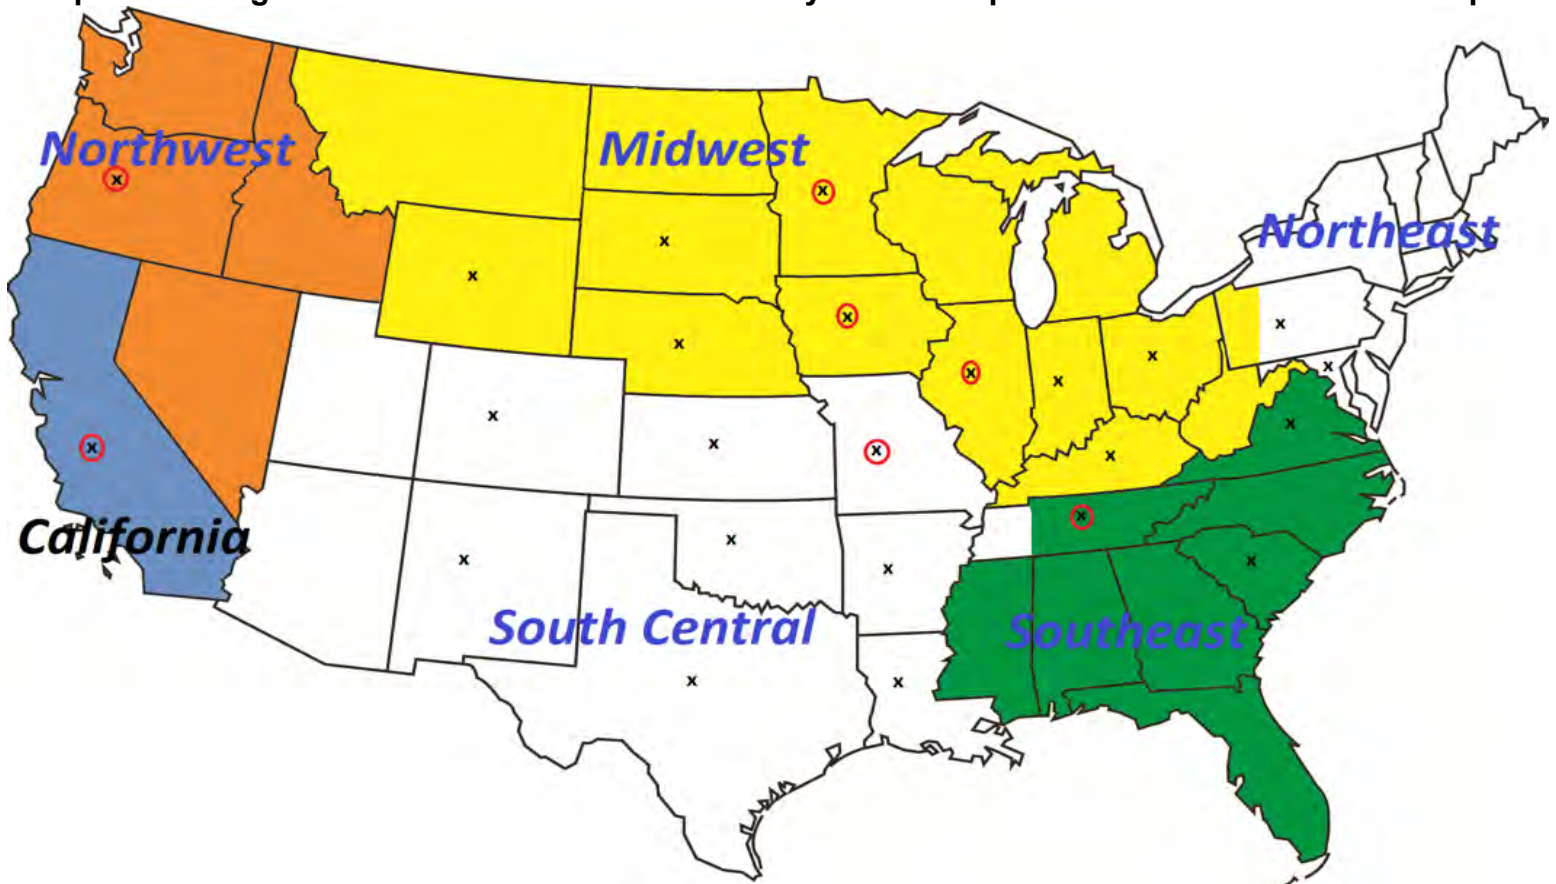

The average feed price is based on a diet consisting of 67% corn, 22% soybean meal, 8% limestone and 3% other ingredients.

The cost of production was adjusted from last year based on producer surveys. There is not enough information to separate costs by region other than using the differences in the feed ingredient prices.

Pullet cost are adjusted by region based on the average feed price for the month, assuming all the other costs are similar between regions.

Feed conversion is variable depending on the month. The labor, building and equipment, interest and miscellaneous costs are assumed to be 17.96 (cents/dozen) for all regions (except California) and months.

**Map of U.S. Regions and the location of corn and soybean meal price information used in this report**

Note: The X's mark the States with monthly corn prices reported by USDA.

The red circles with X's inside (ⓧ) mark the States with monthly corn and SBM prices reported by USDA.

**Highlights and comparison with previous month and previous year.  
Prices and Percent Changes**

**Difference with respect to July last year (2019 vs. 2018).**

Corn Price (\$/ton)		SBM Price (\$/ton)		Feed Cost (\$/ton)		Cost of Prod (cents/doz.)		Egg Price (cents/doz.)	
+31.76	+23.1%	-27.38	-7.9%	+15.97	+8.1%	+3.45	+5.8%	-64.67	-68.5%

In July, corn prices were \$31.76/ton (23.1%) higher than in the previous year. Soybean Meal prices were \$27.38/ton lower than July last year.

These changes in prices resulted in a \$15.97/ton (8.1%) higher cost of feed and 3.45 cents/doz. (5.8%) higher cost of production than July last year.

The July 2019 egg price paid to producers was 64.67 cents/doz. (68.5%) lower than in July 2018.

**Difference with respect to the previous month this year (July 2019 vs. June 2019).**

Corn Price (\$/ton)		SBM Price (\$/ton)		Feed Cost (\$/ton)		Cost of Prod (cents/doz.)		Egg Price (cents/doz.)	
-0.09	-0.1%	-10.79	-3.2%	-2.43	-1.1%	-0.43	-0.7%	-8.71	-22.7%

The July corn price was \$0.09/ton (0.1%) lower than the previous month. Soybean Meal prices were \$10.79/ton (3.2%) lower.

These changes in prices resulted in a \$2.43/ton (1.1%) lower cost of feed and 0.43 cents/doz. (0.7%) lower cost of production than last month.

The July 2019 egg price paid to producers was 8.71 cents/doz. (22.7%) lower than the previous month.

Source: Egg Industry Center.

\* These estimations are based on feed costs (cents/dozen) shown in table 6, pullet costs (cents/dozen) shown in table 5. Building and equipment, labor, interest and miscellaneous costs are assumed to be 17.96 cents/dozen (except for CA, please see below) Some assumptions were made in the absence of enough information of cost of production under the new California regulations.

These assumptions that are a clear simplification of the changes in different costs are:

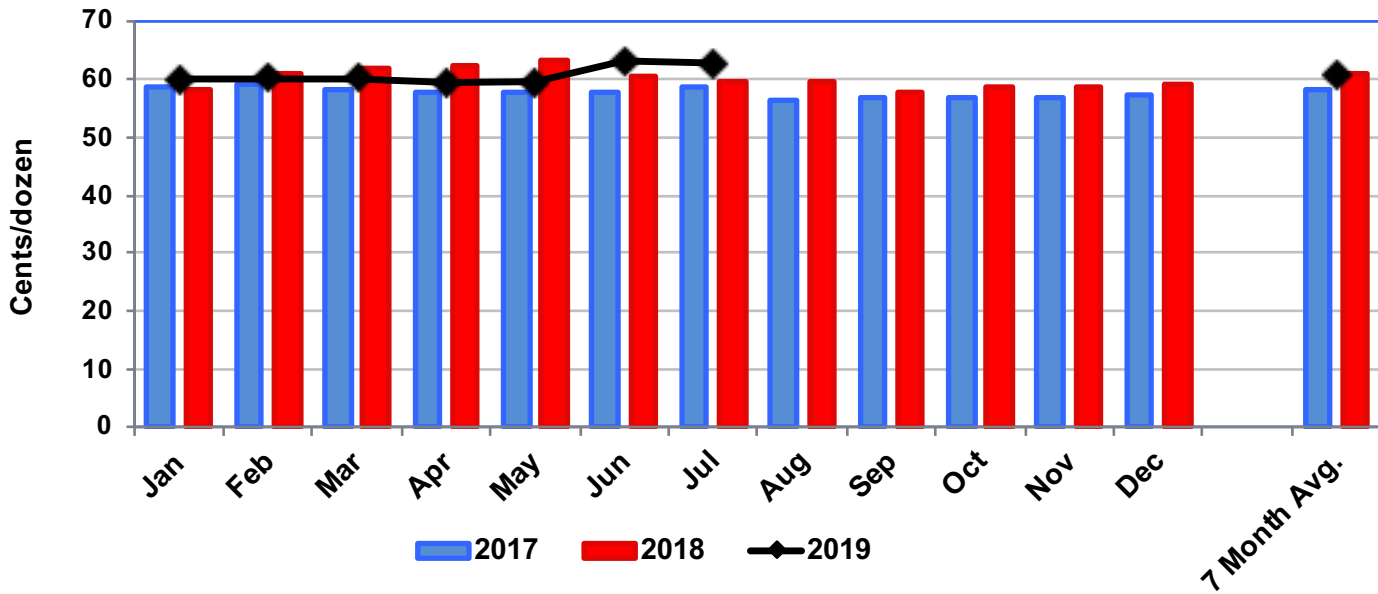

- 1) the feed efficiency and pullet cost are similar between California and the rest of the country
- 2) the "building and equipment, labor, interest and miscellaneous" costs are assumed to increase proportionally to the space per layer increase or 73% higher (116 in<sup>2</sup>/67 in<sup>2</sup>) than on the other regions which put them at at 30.33 cents/dozen (17.96 \* 116/67)

These costs had been estimated as 1.025 \* last year costs until we get a new COP survey

These estimations are based on standard costs for conventionally produced eggs. Higher labor costs might exist in certain regions.

Newer, more efficient farms, would probably use less labor but have higher equipment costs.

Figure 2: Cost of Production by Month

Note: "5-Region avg" is the simple average of the NE, SE, SC, MW, and NE regions. California is not considered for the average because of the different production requirements.

Source: Estimated using Urner Barry's price quotations by regions

Source: Bureau of Labor Statistics (Dept. of Commerce)

For this report, the price paid to producers for each size eggs is estimated by subtracting an "adjustment factor" from Urner Barry quotations of prices by region. The "adjustment factor" we are using varies around 42 cents/dozen and it is estimated by comparing the historical relationship between the Urner Barry prices with the Trailer Load prices reported by USDA.

The Undergrades eggs price is estimated as the price of Checks eggs as reported by USDA Marketnews minus 25 cents (up to a minimum of 8 cents) adjusted by the differences in prices between regions.

The average price of all eggs is estimated based on the proportions of Jumbo, Extralarge, Large, Medium, Small and Undergrades eggs. Based on the Breeders Performance Manuals up to 90 weeks of age.

Adjustment figures between Urner Barry quotes and producer prices are subject to change monthly and between regions and companies

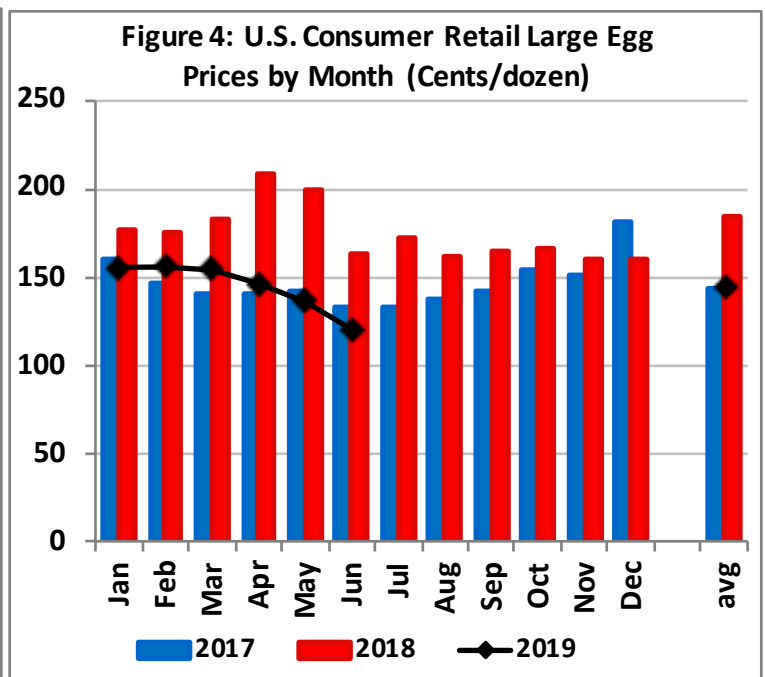

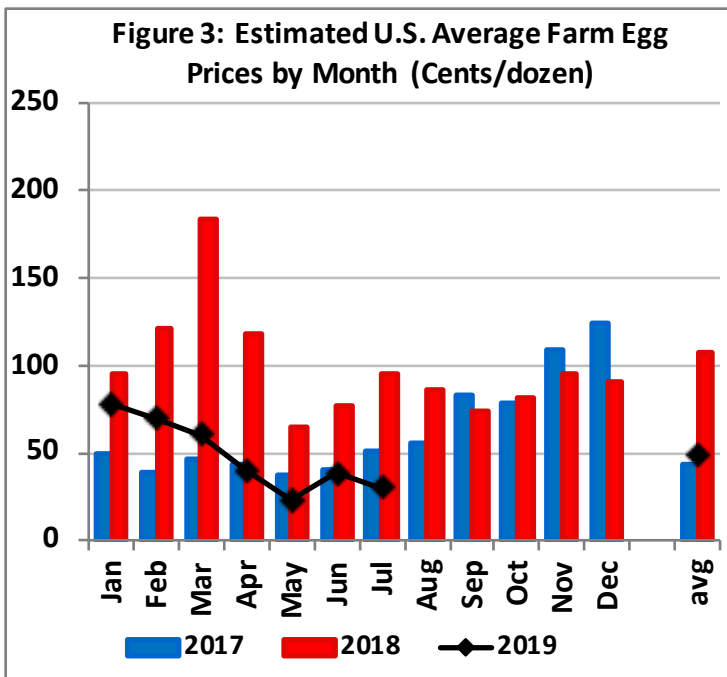

TABLE 9

ESTIMATED TOTAL COSTS comparing Breeders Manuals values vs. some loss in production efficiency (Cents/doz.) - 2019

month	TOTAL Cost (cents/dozen)

<b>7 Month Avg.</b>	<b>60.76</b>	<b>62.35</b>	<b>60.81</b>	<b>61.17</b>	<b>62.40</b>	<b>62.76</b>	<b>61.40</b>	<b>62.99</b>

Source: Egg Industry Center, based on [USDA Marketnews](#) published prices of corn and soybean meal

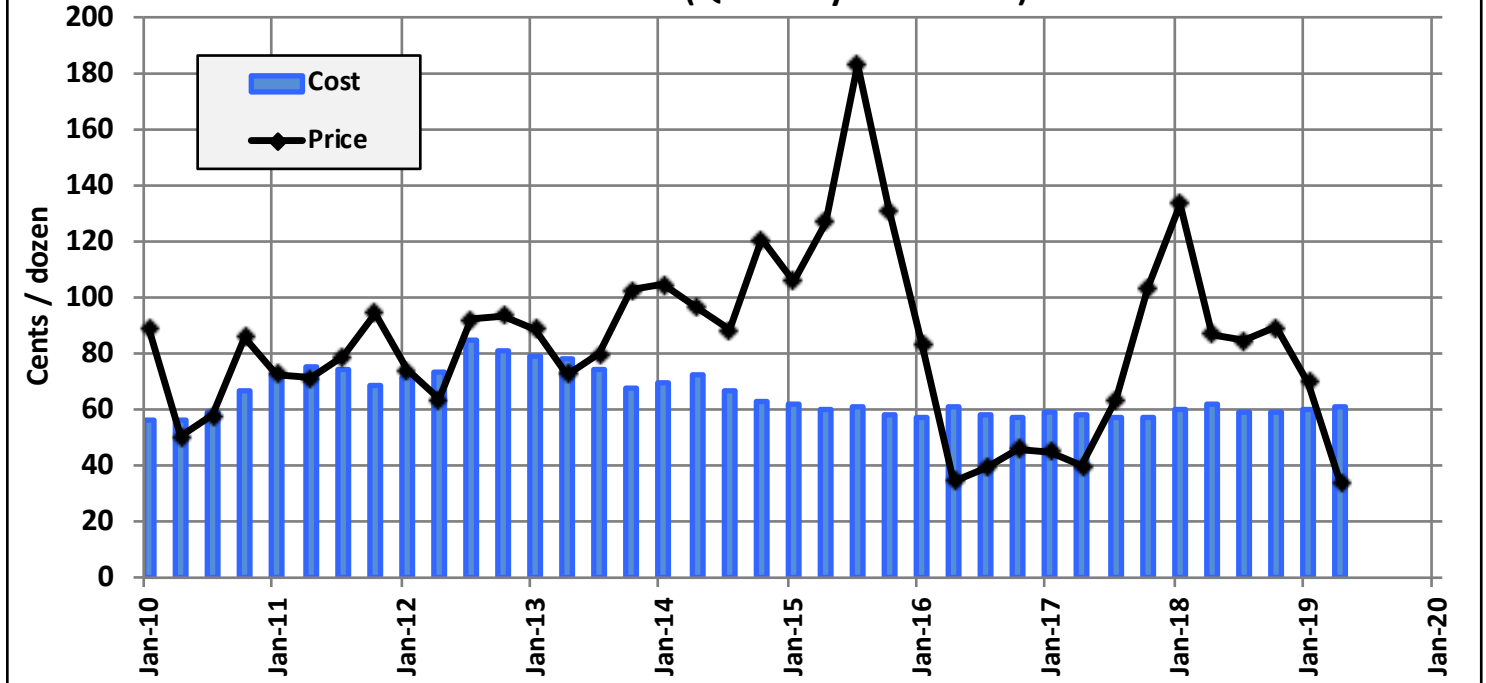

"Manuals" is estimated using the weighted average of Breeders Manuals (70% Hyline w-36, 15% Shaver White, 8% Lohmann LSL-Lite and 5% Bovans White) for 20 to 90 weeks of age.

"5% higher feed conv." is the estimated cost if the feed conversion were 5% higher than the breeders manuals value (using 3.30 lbs./dozen instead of 3.14 lbs./dozen)

"5% higher pullet feed." is the estimated cost if the feed used to grow pullets were 5% higher than the breeders manuals value (using 14.6 lbs./pullet instead of 13.9 lbs./pullet)

"lower eggs/ hen housed" is the estimated cost if the number of eggs per hen-housed were 5% lower than the breeders manuals value (using 394 eggs/hen-housed instead of 414 eggs/hen-house)
