

U.S. Egg Cost of Production and Prices

May 6, 2020

Compiled by
Maro Ibarburu

Sponsored in part by:

American Egg Board

The Egg Industry Center Market Reports & Industry Analysis are compiled in the memory of their creator, Don D. Bell, Poultry Extension Specialist Emeritus - UC Davis.

REPORT NOTE: This report estimates the average layer feed price and cost of production in six different U.S. regions as outlined on the following map. It also reports the EIC projected prices of eggs.

This report uses the corn and soybean meal prices reported by **USDA AMS Market News**. Monthly corn and soybean prices for each region are estimated as the simple average of prices for the States with pricing information in each region (please see map below)

There is no price information for soybean meal in any of the Northeast States. Therefore, we estimate the soybean meal prices for the Northeast region based on the historical relationship with the Midwest price.

The West region prices are estimated as the simple average of California and Oregon prices.

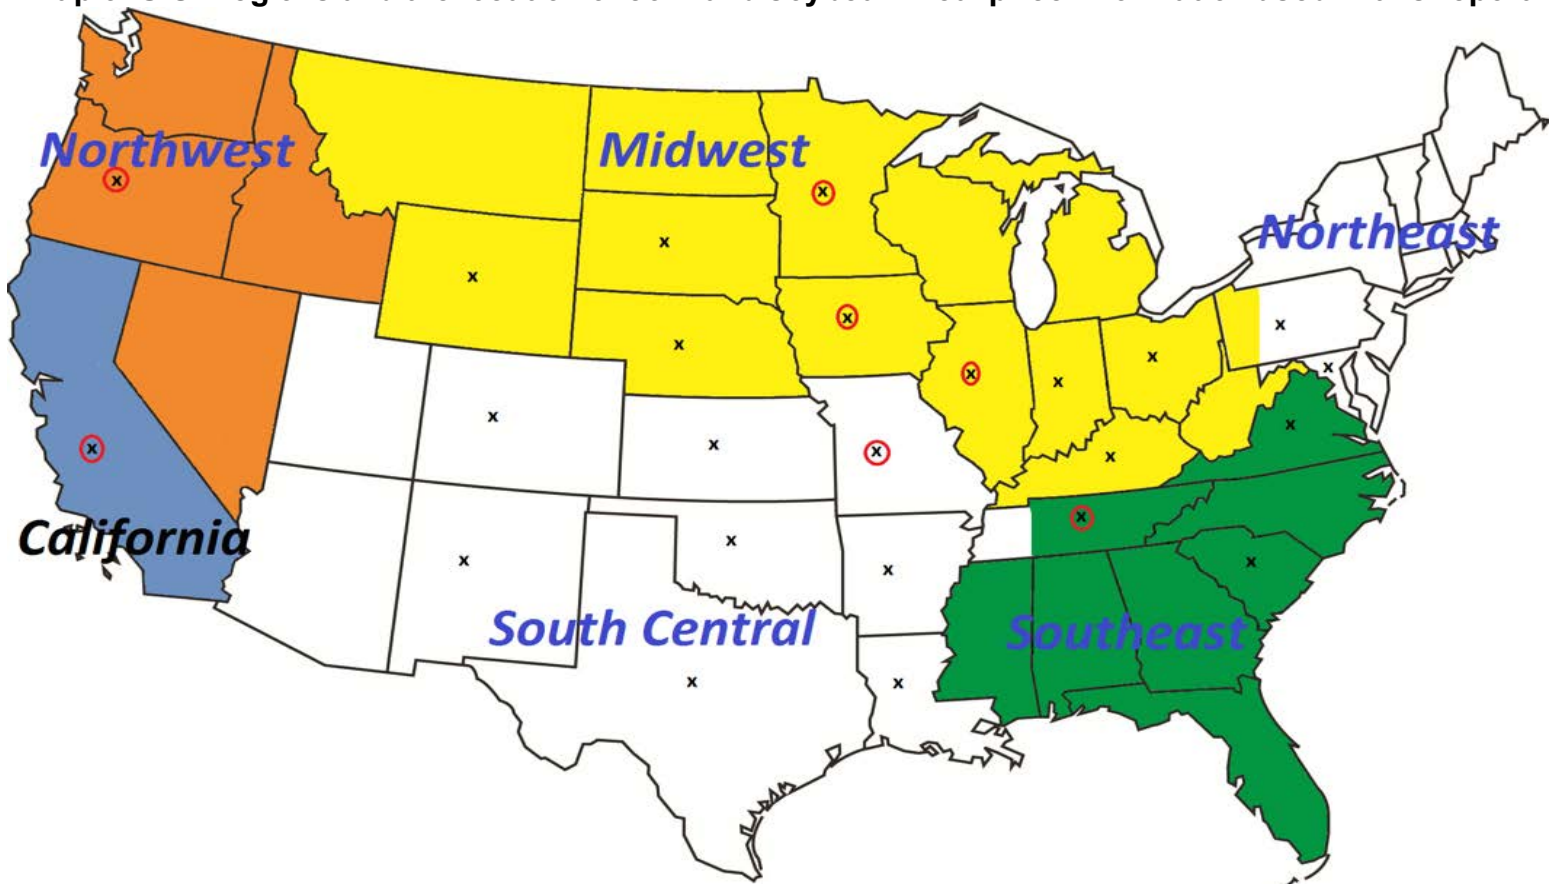

The average feed price is based on a diet consisting of 67% corn, 22% soybean meal, 8% limestone and 3% other ingredients.

The cost of production was adjusted from last year based on producer surveys. There is not enough information to separate costs by region other than using the differences in the feed ingredient prices.

Pullet cost are adjusted by region based on the average feed price for the month, assuming all the other costs are similar between regions.

Feed conversion is variable depending on the month. The labor, building and equipment, interest and miscellaneous costs are assumed to be 18.27(cents/dozen) for all regions (except California) and months.

Map of U.S. Regions and the location of corn and soybean meal price information used in this report

Note: The X's mark the States with monthly corn prices reported by USDA.

The red circles with X's inside (ⓧ) mark the States with monthly corn and SBM prices reported by USDA.

**Highlights and comparison with previous month and previous year.
Prices and Percent Changes**

Difference with respect to April last year (2020 vs. 2019).

Corn Price (\$/ton)		SBM Price (\$/ton)		Feed Cost (\$/ton)		Cost of Prod (cents/doz.)		Egg Value (cents/doz.)	
-13.29	-9.3%	-0.58	-0.2%	-8.51	-4.4%	-1.09	-1.8%	+88.85	+223.9%

In April, corn prices were \$13.29/ton (9.3%) lower than in the previous year. Soybean Meal prices were \$0.58/ton lower than April last year.

These changes in prices resulted in a \$8.51/ton (4.4%) lower cost of feed and 1.09 cents/doz. (1.8%) lower cost of production than April last year.

The April 2020 egg value to producers was 88.85 cents/doz. (223.9%) higher than in April 2019.

[The last 12-month average egg value was 15% lower than the 10-year average for the same period.](#)

Difference with respect to the previous month this year (April 2020 vs. March 2020).

Corn Price (\$/ton)		SBM Price (\$/ton)		Feed Cost (\$/ton)		Cost of Prod (cents/doz.)		Egg Value (cents/doz.)	
-15.41	-10.6%	-10.14	-3.1%	-12.55	-6.3%	-2.24	-3.7%	-31.13	-19.5%

The April corn prices were \$15.41/ton (10.6%) lower than the previous month. Soybean Meal prices were \$10.14/ton (3.1%) lower.

These changes in prices resulted in a \$12.55/ton (6.3%) lower cost of feed and 2.24 cents/doz. (3.7%) lower cost of production than last month.

The April egg value to producers was 31.13 cents/doz. (19.5%) lower than the previous month.

CORN PRICE BY REGION (\$/ton) - 2020

Source: Egg Industry Center.

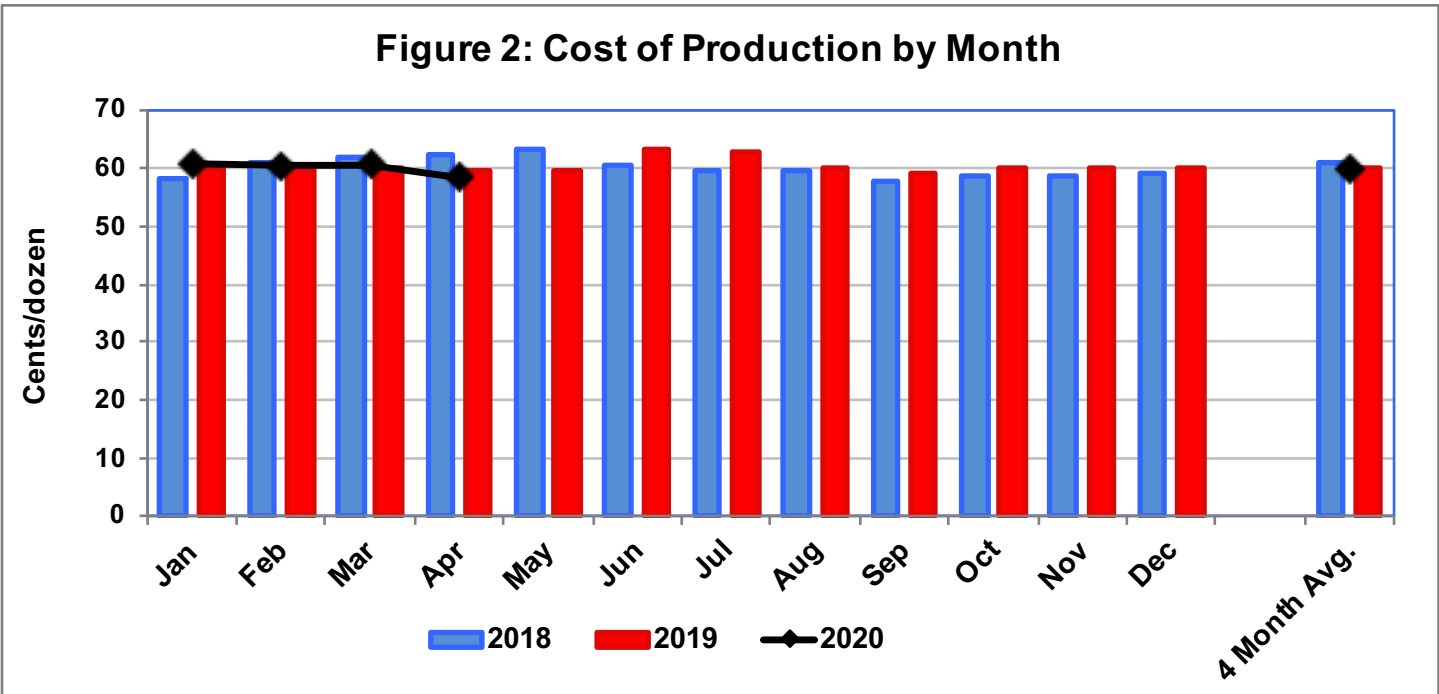

* These estimations are based on feed costs (cents/dozen) shown in table 6, pullet costs (cents/dozen) shown in table 5. Building and equipment, labor, interest and miscellaneous costs are assumed to be 18.27 cents/dozen (except for CA, please see below) Some assumptions were made in the absence of enough information of cost of production under the new California regulations.

These assumptions that are a clear simplification of the changes in different costs are:

- 1) the feed efficiency and pullet cost are similar between California and the rest of the country
- 2) the "building and equipment, labor, interest and miscellaneous" costs are assumed to increase proportionally to the space per layer increase or 115% higher (144 in²/67 in²) than on the other regions which put them at at 39.27 cents/dozen (18.27 * 144/67)

These costs had been estimated as 1.043 * year 2018 costs until we get a new COP survey

These estimations are based on standard costs for conventionally produced eggs. Higher labor costs might exist in certain regions. Newer, more efficient farms, would probably use less labor but have higher equipment costs.

Note: "5-Region avg" is the simple average of the NE, SE, SC, MW, and NE regions. California is not considered for the average because of the different production requirements.

U.S. ESTIMATED FARM EGG PRICE AND RETAIL EGG PRICE (cents/Doz)

Source: Estimated using Urner Barry's price quotations by regions

Source: Bureau of Labor Statistics (Dept. of Commerce)

For this report, the value to producers for each size eggs is estimated by subtracting an "adjustment factor" from Urner Barry quotations of prices by region. The "adjustment factor" we are using varies around 40.32 cents/dozen and it is estimated as the sum of the following costs estimated in the PCT study published in April 2019: carton cost + case cost + finishing cost + processing cost + cost of delivering to store door + loss from store returns + additional cost of USDA certification

The average price of all eggs is estimated based on the proportions of Jumbo, Extra-large, Large, Medium, Small and Undergrades eggs. Based on the Breeders Performance Manuals up to 90 weeks of age, assuming 5% check eggs and 1% loss.

Adjustment figures between Urner Barry quotes and producer prices are subject to change monthly and between regions and companies

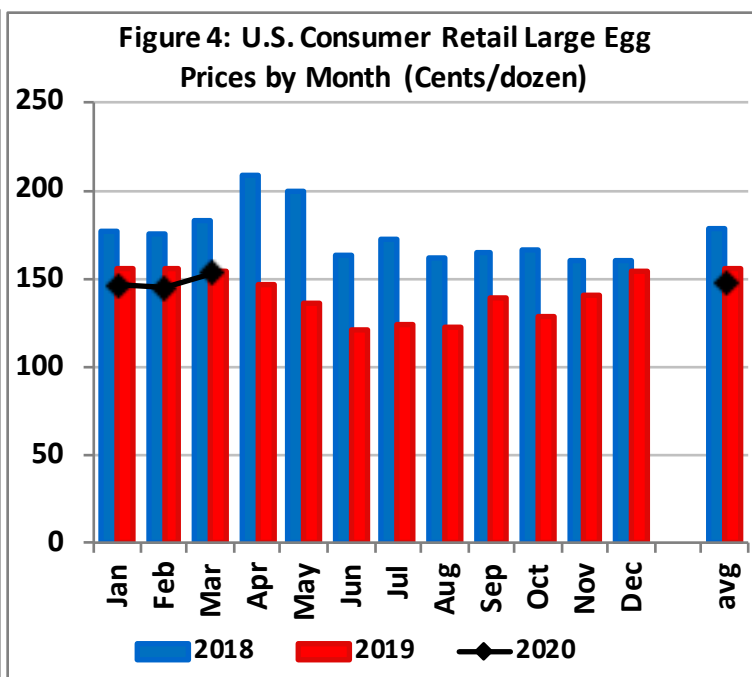

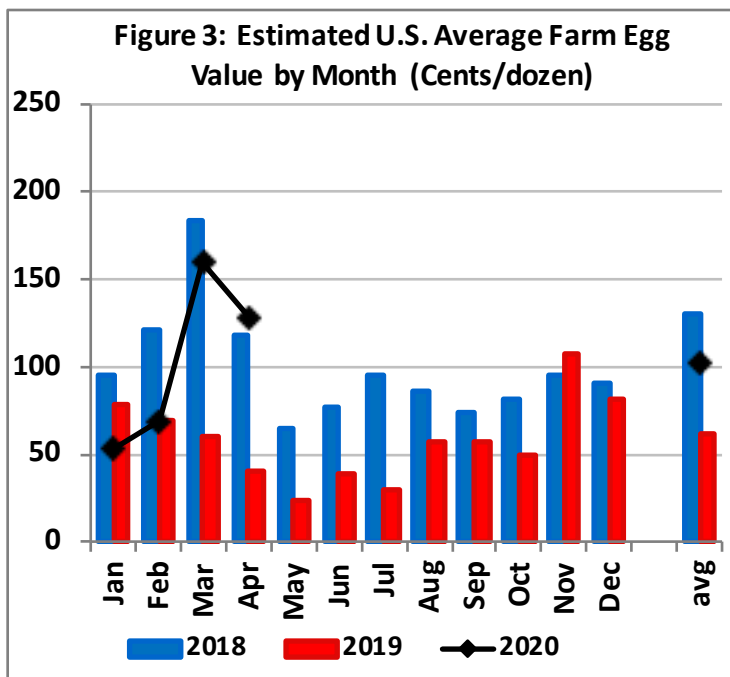

TABLE 9

ESTIMATED TOTAL COSTS comparing Breeders Manuals values vs. some loss in production efficiency (Cents/doz.) - 2020

month	Manuals	TOTAL Cost (cents/dozen)						
		5% higher feed conv. A	5% higher pullet feed B	lower eggs/hen housed C	A and B	A and C	B and C	A, B, and C

4 Month Avg.	60.04	61.58	60.25	60.62	61.79	62.16	60.84	62.38

Source: Egg Industry Center, based on [USDA Marketnews](#) published prices of corn and soybean meal

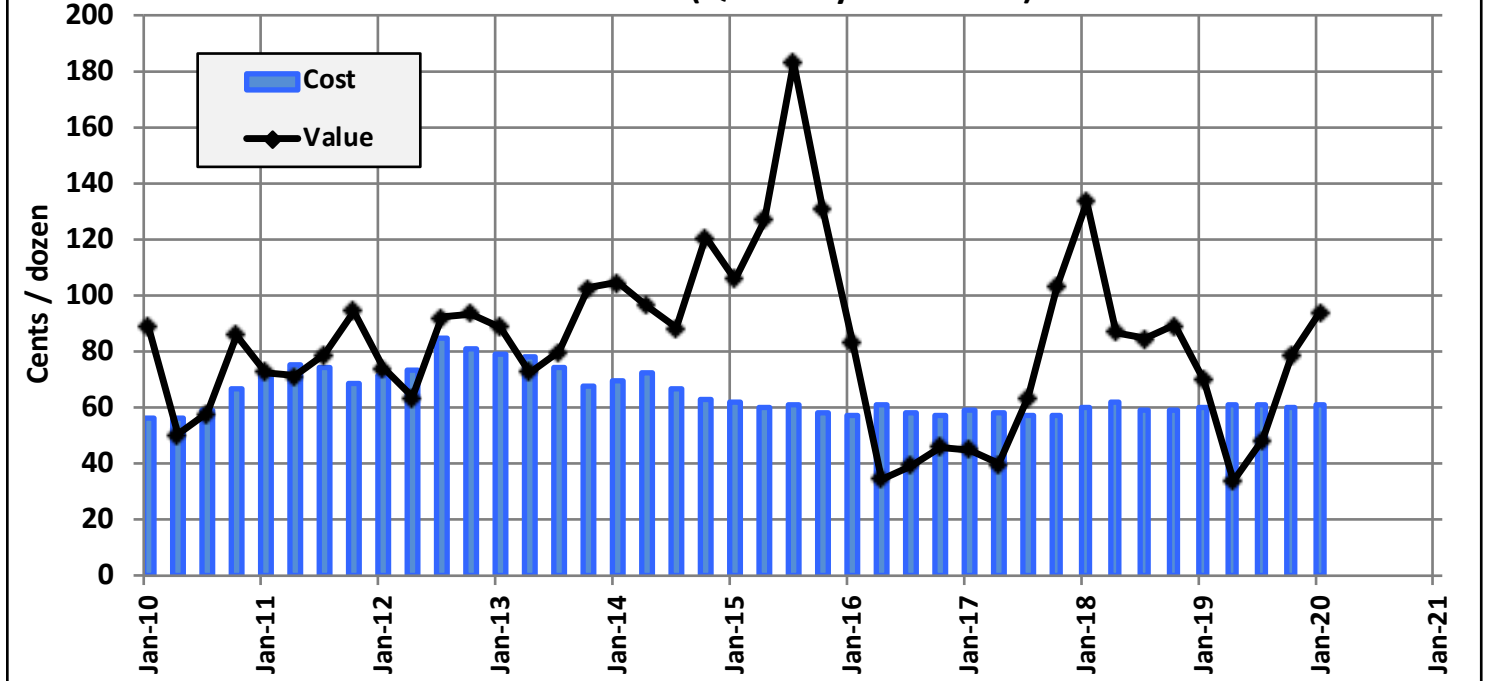

"Manuals" is estimated using the weighted average of Breeders Manuals (70% Hyline w-36, 15% Shaver White, 8% Lohmann LSL-Lite and 5% Bovans White) for 20 to 90 weeks of age.

"5% higher feed conv." is the estimated cost if the feed conversion were 5% higher than the breeders manuals value (using 3.30 lbs./dozen instead of 3.14 lbs./dozen)

"5% higher pullet feed." is the estimated cost if the feed used to grow pullets were 5% higher than the breeders manuals value (using 14.6 lbs./pullet instead of 13.9 lbs./pullet)

"lower eggs/ hen housed" is the estimated cost if the number of eggs per hen-housed were 5% lower than the breeders manuals value (using 394 eggs/hen-housed instead of 414 eggs/hen-house)

Figure 5: Estimated Cost of Production and Producer Non-Processed Egg Value in U.S. (Quarterly 2010-2019)
